

esirih²

Collision sensor

Sensitive collision sensor with auto-reverse: safety feature that stops and reverses movement if an obstacle is encountered.

Modular and interchangeable

Matching adjustable-height and fixed-height desks may be freely combined and rearranged as desired. Control costs by only specifying height adjustability where necessary.

Easily change configurations

The functionality of bench desks with the flexibility of stand-alone desks. Desks configured back-to-back can be used independently if workplace needs change.

Letterbox screens

Letterbox screens with cable trays separate back-to-back desks but allow shared access to cabling.

Complementary tables

Wide choice of meeting tables with colour matched frames.

Fixed-height desks

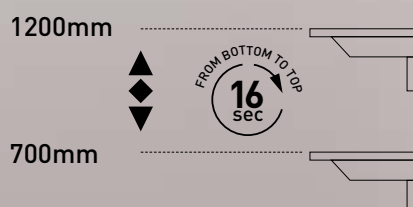

Fixed and adjustable-height desks have matching frames, and share the same options of cable trays, modesty panels and screens.

Slimline drawers

Optional slimline drawers keep frequently used items conveniently to hand.

HiRise² height range

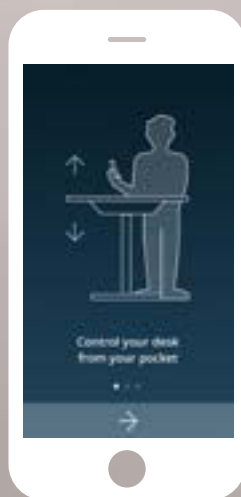

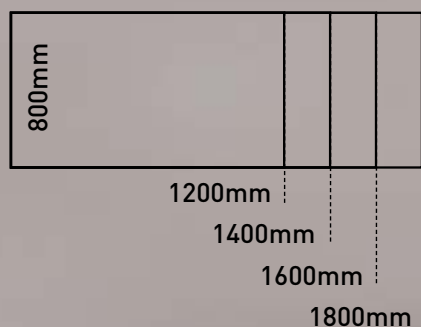

Low noise – just 37dB

Long life: tested to EN527 with double durability (10,000 cycles)

(HiRise² fixed height desks are 735mm high)

Control options

Control pad with digital height display and four memory settings — or use the Bluetooth app (iOS /Android) to control your desk from your phone. The app also features calorie tracking, information messages and configurable sit/stand reminders.

Slimline drawers

Optional drawers keep frequently used stationery and small personal items conveniently to hand.
